Prince George's County COVID-19 Vaccination Update

Dear Prince Georgians:

- As a reminder, the County's indoor public mask mandate remains in effect after the County Council recently passed a resolution extending the mandate. All residents and visitors ages 5 and up are required to wear a mask in all indoor public establishments, regardless of your vaccination status.
- The County Health Department is closely monitoring updates and recommendations regarding COVID-19 booster shots. At this time, the booster shot is not approved for the general public. We will provide an update on booster shot recommendations once we receive official guidance from federal and state governments. At this time, third doses of the Pfizer and Moderna vaccines are available only for Prince Georgians who have a weakened immune system.
- PGCPSS is hosting another round of COVID-19 vaccination clinics for students ages 12 and up. We encourage you to take advantage of this opportunity to get protected from COVID-19. Learn more [here](#).

Yours in service,

Angela Alsobrooks

Prince George's County Executive

Vaccine Supply & Administration

Data as of 9/17/21

- The County Health Department has provided over 170,400 vaccinations, including 1,000 during the last two weeks. We provided over 1,400 vaccinations during the first half of September.
- Our mobile units provided over 500 vaccinations in the community during the first half of September.

- During the last two weeks, 436 first or single doses, 530 second doses, and 34 third doses were provided by our County Health Department.
- When including all vaccination clinics in Prince George's County, we saw a slight increase in first or single doses over the last two weeks (September 1 – September 16) with 12,200 residents, compared to approximately 9,985 residents in the prior two weeks.

Vaccination Locations

While the County Health Department now operates only one standing vaccination clinic in the County, in addition to nine mobile vaccination units, there are a number of vaccination sites available in Prince George's County that are not operated by the County. Please remember that we do not manage nor control appointments or distribution for any sites besides those operated by our County Health Department.

Prince George's County Health Department

- **Locations:** The Sports & Learning Complex and Mobile Vaccination Units.
- **Appointments:** Individuals who live or work in Prince George's County should visit mypgc.us/COVIDVaccine to view clinic hours or schedule an appointment directly. Individuals who cannot schedule an appointment online on their own should call 311 and press # for assistance.
- Residents can also view a calendar of mobile vaccination clinics [here](#).

Additional Non-County Operated Sites

- Please use our [County Vaccine Locator](#) to find additional vaccination sites operated by pharmacies, hospitals, and other healthcare partners.

Progress Toward Vaccination Goals

- Over 982,700 vaccines have been provided to County residents. 534,523 County residents have received at least one dose of a vaccine.
- As of September 16, the CDC has reported 79.7% of adults 18 and older have received at least one vaccination in the County and over 70% are fully vaccinated.
- When including all residents ages 12 and older, 79.1% of residents have received at least one dose of a COVID-19 vaccine, according to the CDC.
- Over 91% of seniors (ages 65 and older) in the County have now received at least one dose of a COVID-19 vaccine.
