

COVID-19 Vaccine Reminder

**PLEASE DO NOT SHARE YOUR
VACCINATION APPOINTMENT
LINK WITH OTHERS!**

The Health Department uses the pre-registration list to send appointment links to eligible individuals as appointments become available based on vaccine supply.

What happens when you share your appointment link with your friends, family, and colleagues?

The Health Department must manually delete those individuals who schedule appointments that are not currently eligible to receive the vaccine.

When individuals who are not currently eligible to receive the vaccine schedule an appointment, it delays the scheduling of those individuals who are eligible.

Individuals who are not eligible and show up to the County Health Department's vaccination sites will be turned away at the door, even if you have a scheduled appointment. This also creates longer lines at our vaccination sites.

You must pre-register with the Health Department in order to receive an appointment link to get your vaccine.

The pre-registration form is available on our website at:
