

UTILITY SHEET INSTRUCTIONS

Clients are responsible for submitting a completed Moving Package, staying within the client's 40% maximum rent as stated on the Payment Worksheet. The utility sheets attached are to be used to calculate the Utility Allowance that is approved by HUD. Remember that the rent plus the utility allowance added together must stay within the tenant's 40% maximum rent to submit the moving package. Final rent approval will be determined by the inspector, after rent comparisons and inspection have been completed.

There are four different utility sheets attached:

- Garden/High-rise
- Attached 2 Walls Exposed (center unit Townhouse or Rowhouse), The front and back of unit are exposed to the elements.
- Semi-Detached 3 Walls (end unit Townhouse or Rowhouse), The front, one side and back are exposed to the elements.
- Detached 4 Walls (single family home).

When calculating the utilities, use the proper sheet for the unit you are applying for. Find the number of bedrooms of the unit, then go down the column and circle each utility that applies. Total the columns, add to the rent the owner is asking. This will give you the total rent of the unit. If this figure is higher than the tenants 40% maximum, the rent on the unit is too high. Subtract the tenants 40% maximum from the total rent (rent plus utilities) and this will be the amount the owner must drop the rental price in order to submit the moving package.

Other Electric means Lights

In most cases, if you pay for Water you also pay for Sewer. Remember to circle both.

Moving Package must be complete and within the clients 40% maximum or it will not be process and will be returned to the client.
